## **TEAM BOLT**

We decided to discuss our experience working virtually with our classmates because we think that in the last 2 years each of us got used to the internet working.

Online working	Offline working
<ul style="list-style-type: none"> <li>- It's simple for everyone to work together at the same time for one document or project</li> </ul>	<ul style="list-style-type: none"> <li>- The ideas could be a little bit stronger than online because the people are face to face</li> </ul>
<ul style="list-style-type: none"> <li>- Making decisions could be hard because each of you is connected from another place and the internet connection can be weak</li> </ul>	<ul style="list-style-type: none"> <li>- Face to face we can say that it's easier making decisions sometimes because we are all together and can discuss about the topic; at the same time can be as hard as online working because every human is different and have different ideas about a subject</li> </ul>
<ul style="list-style-type: none"> <li>- In general, we think that being online it's a way that makes you feel uncomfortable, because you are alone, in a room or a place, talking to a laptop/phone and don't know if the other people that are with you in the meeting truly hear you, if they don't have their camera on; obviously, for some of us, the online working was a way to encourage all the people that are introverts to talk easily ,in front of a class</li> </ul>	<ul style="list-style-type: none"> <li>- Here, we have two ideas: for introverts people, it's a difficult way to express their ideas, even if the people that are in the same room with them are their colleagues or something; on the other hand, for a big part of us the offline meetings are something that bring us back to reality before Covid-19 and give us that experience near colleagues</li> </ul>
<ul style="list-style-type: none"> <li>- About quality of output we can say that in online meetings it's less work just for one from the team, because you can connect so fast and work together for the task and the end can be amazing for everyone; also, there are a lot of programs that help us with all achievements that we need to do, at the same time we</li> </ul>	<ul style="list-style-type: none"> <li>- On the other hand, when we are together working for a project or a task, the ideas are more diverse, and each of us is involved in the topic; although online working is a right way for making projects, because it's helpful, the meeting face to face with your colleagues for work, have fun and hang out is so different, that's why in a</li> </ul>

can make it so easily and fabulous with just a few clicks	lot of situations, a meeting like on site made an extraordinary solution for a task or a good project
---	---

In our opinion, online meetings have a good part in our life experience, but the face-to-face meeting is the most important for our school and development. It's true that online does some of us a favor, because it's friendlier and it can't show the people's reactions if they don't have the camera on, so we become more confident with our ideas and points of view. On the other side, being with your colleagues in a class is a different feeling, that can help all of us to make stronger relationships and a good cooperation for each of us. We become closer and that's one of the reasons for going to school/university/course: to meet new people and try to see other personalities different than yours.
