

## Telegram terms and conditions

Telegram is a **free application** that provides a wide range of services, including unlimited cloud storage, 2 GB file uploads, audio and video calls, group chats up to 200,000 members, support for multiple devices, and more.

Accepting the privacy policy by signing up for Telegram is essential. Also agree not to:

- Use their service to send spam or scam users.
- Promote violence on publicly viewable Telegram channels, bots, etc.
- Post illegal pornographic content on publicly viewable Telegram channels, bots, etc.

Citizens of Eu countries and the UK must be at least 16 years old to sign up.

In addition to privacy policy users have possibility to hide their account from other users choosing themselves who they want to be seen for. Also hiding their phone number I found very convenient in case you are dealing with someone unknown.

The use of personal data by the app is nearly nonexistent except for account information. This is why I prefer Telegram over Whatsapp for communicating. You are not facing afterwards advertisements about things you have discussed on the platform
