

Marriott Data Breach

Gopi Krishna,
Hochschule Bremen

Threat overview

Affected information resource:

Marriott International Inc., is one of leading hotel & accommodation chains in the world, and they have been attacked by hackers multiple times.

- Several data information was breached and extrapolated
- First attack happened in 2014
- Recent attack reported on 06 Jul 2022
- 20 Gb worth of data was stolen

Threat overview

Modus operandi of the threat

- Attackers used the social engineering method to perform the hacking
- Hackers tricked the employees and gained computer access at the hotel

Threat actors

- Unknown and had no name of the group or the hackers

Threat overview

Related protection measure

- Marriott management was fined by the courts of £20 million for inadequate data security measures
- No measure has been taken because it is apparently common in companies to not have regard into this kind of concern.

Thank you
